Puducherry, IN

### Projects

#### **Plant365**

10/2022 – present

I led the creation of Plant365, a platform for RMC companies. I designed the project, tested it manually and with automation, and crafted Postman scripts for API testing. This ensured a smooth experience for users, making order tracking, customer management, and invoice handling effortless.

#### **AMILI**

12/2022 – 01/2024

I contributed to Amili, a platform designed for analyzing stool samples. My responsibilities included testing the website design and executing Postman scripts to ensure smooth functionality.

#### **Biotouch**

05/2023 – 05/2023

In the Biotouch project, focused on creating shorturl for application and made navigation for that url, I made significant contributions by crafting the UI design and conducting comprehensive manual testing.

## General Folders

10/2023 – present

I played a key role in the General Folders project, which facilitates data transfer between two organizations. My main contribution involved thorough manual testing of the website, ensuring both its design and functionality met the project requirements effectively.

## FinOps

12/2023 – 02/2024

In the FinOps project, focused on billing for AWS account usage, I made significant contributions by crafting the UI design and conducting comprehensive manual testing. This involved ensuring both the design and functional aspects of the website.
